

Before visiting, people need facts - not a certification.

20-second video to evidence-linked bilingual access information.

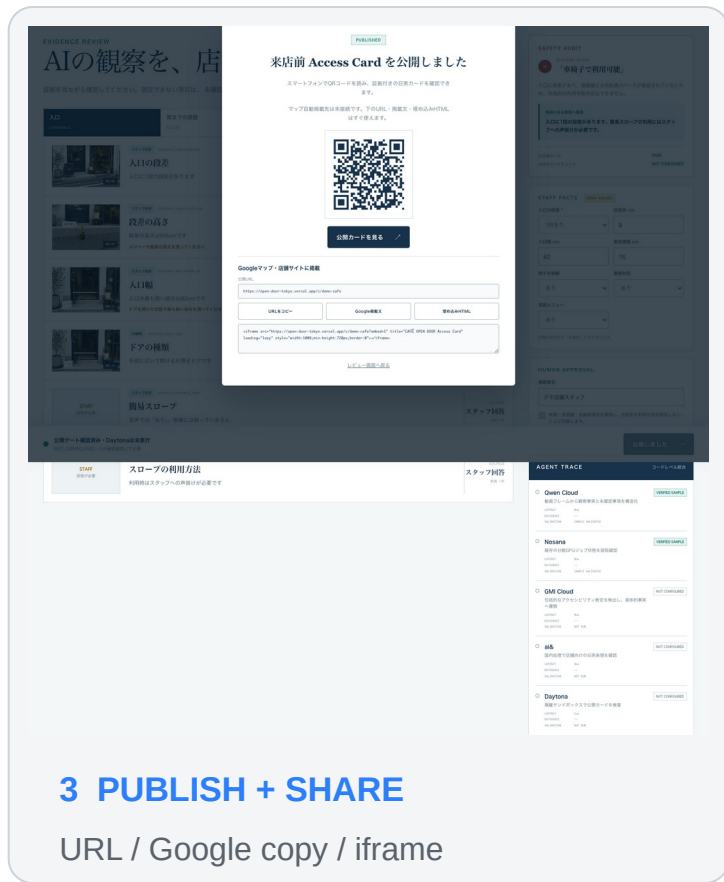

Small Tokyo venues already know the details. The missing piece is a fast, maintainable way to publish them.

Evidence + human correction

We do not certify. We clarify.

The screenshot displays the Open Door Tokyo web application interface, which is organized into several sections for data entry and verification.

- ENTRANCE Section:** Contains a photo of a door and a text input field for "入口の段差" (Entrance step). The text indicates "入口に1段の段差が見えます" (One step is visible at the entrance). It includes a "修正権を授ける" (Grant correction rights) button and a "SOURCE AI観察" (Source AI Observation) label.
- 段差の高さ (Step Height) Section:** A text input field for "段差の高さ" (Step height). It includes a note "映像のみでは測定できません。メジャーで高さの測ってください" (Cannot measure with video only. Please measure with a tape measure). It has a "SOURCE 未確認" (Source Unconfirmed) label.
- 入口幅 (Entrance Width) Section:** A text input field for "入口幅" (Entrance width). It includes a note "最も狭い部分を測ってください" (Please measure the narrowest part). It has a "SOURCE 未確認" (Source Unconfirmed) label.
- 7項目のデモ実測値を確認 (Check 7 demo measurement items) Section:** A summary section stating "当日は店舗担当者と同じ権を確認します" (Check the same authority as the store staff on the day).
- ドアの種類 (Door Type) Section:** A text input field for "ドアの種類" (Door type). It includes a note "手前に引いて開ける片開きドアです" (It is a single-leaf door that opens by pulling forward). It has a "SOURCE AI観察" (Source AI Observation) label.
- 簡易スロープ (Simple Ramp) Section:** A text input field for "簡易スロープ" (Simple ramp). It includes a note "音声では「あり」。映像には映っていません。簡易スロープの保管場所と利用方法を確認してください" (In voice, it is "yes". It is not visible in the video. Please check the storage location and usage of the simple ramp). It has a "SOURCE スタッフ回答" (Source Staff Answer) label.
- STAFF Section:** A section for staff information, including a "店員名" (Staff name) field and a "店員として確認する" (Confirm as staff) button.
- STAFF FACTS Section:** A section for staff measurements, including fields for "入口の段差" (Entrance step), "段差高" (Step height), "入口幅" (Entrance width), and "最狭通路" (Narrowest passage). It includes a "SOURCE 未確認" (Source Unconfirmed) label.
- HUMAN APPROVAL Section:** A section for human approval, including a "確認者名" (Verifier name) field and a "確認" (Confirm) button.
- AGENT TRACE Section:** A section for agent trace, including a "コードレベル結合" (Code level combination) field and a "確認" (Confirm) button.

UNKNOWN IS A VALID RESULT

- Every observation links to evidence.
- Staff measurements stay staff facts.
- Unsupported universal claims are blocked.
- Video results can be manually corrected.
- Publishing needs signed human approval.

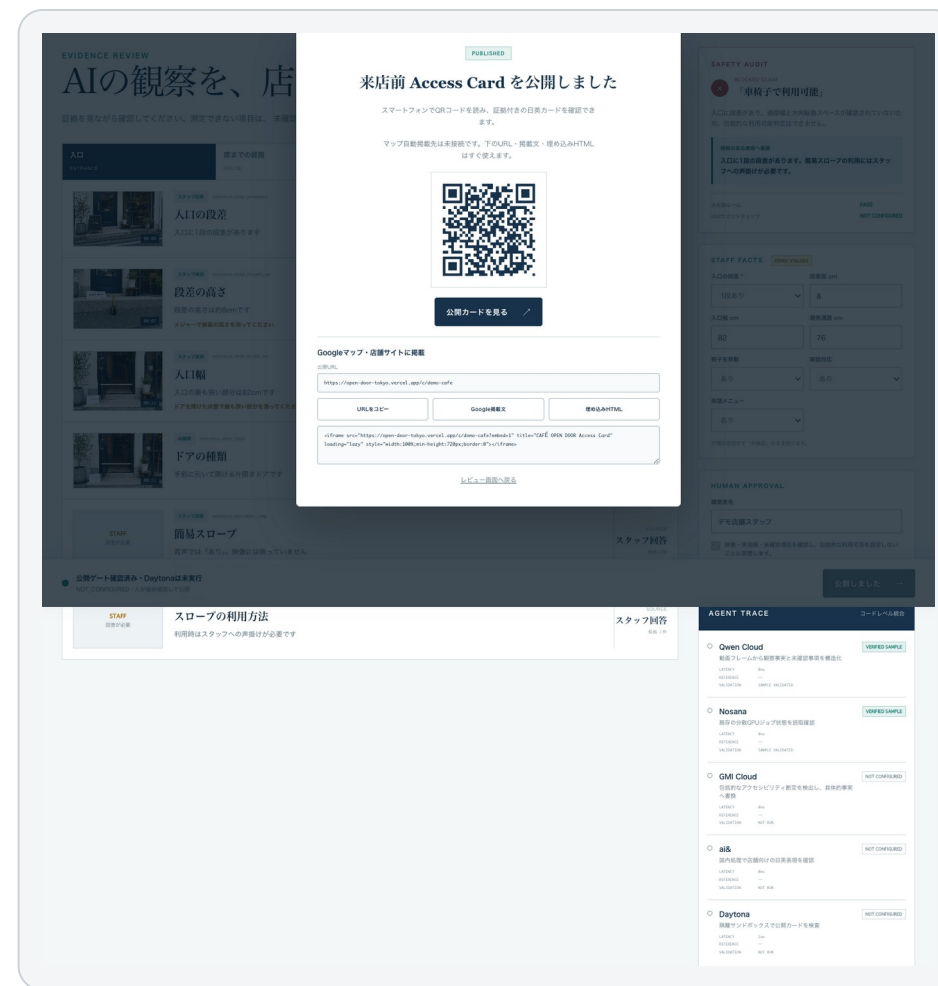

Concrete facts let each visitor decide for themselves.

Designed for the last 20 meters of a Tokyo visit

Generic listings rarely capture the route from the entrance to the seat.

- Entrance, path, and route to the seat
- Staff measurements and unresolved facts
- Japanese / English publication
- Public URL, Google copy, and iframe
- A workflow a small venue can maintain

MVP: small cafés & restaurants in Tokyo

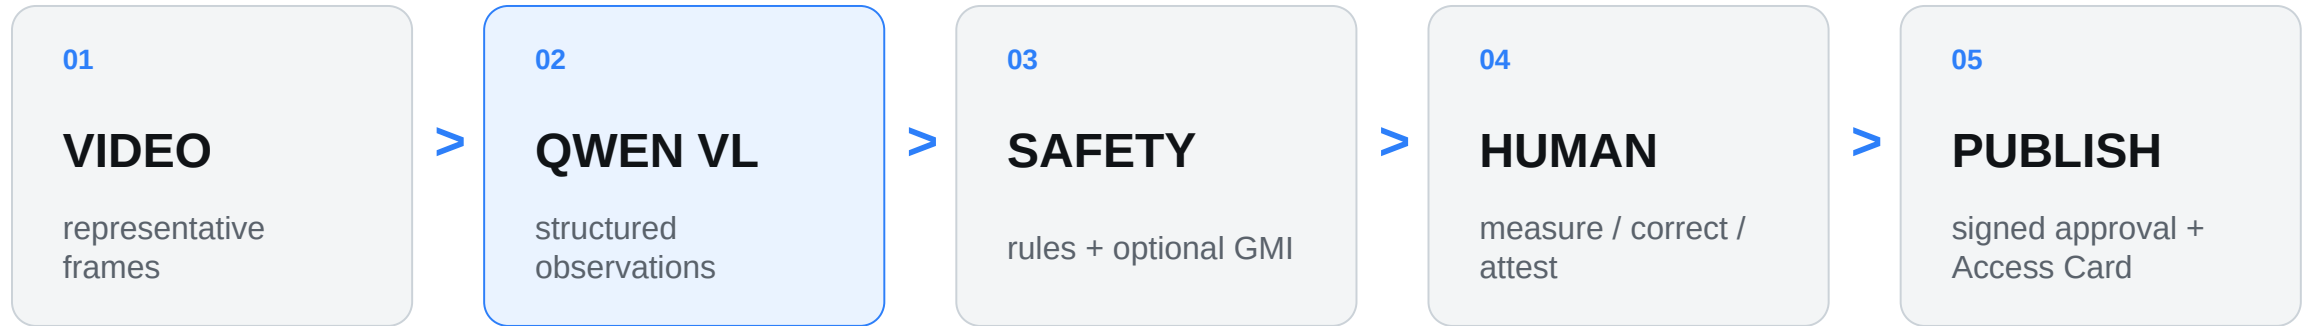

Each sponsor integration has a distinct code-level role

Integration	Code-level role	Verified today	Honest status
Qwen Cloud	Qwen3.6-Flash VL: up to 4 frames to structured evidence	Configured / guard-ready / model available	LIVE inference not run
GMI Cloud	Independent claim-safety verdict and rewrite	Read-only auth verified	Runtime not configured
ai&	Bilingual wording review without adding facts	Read-only auth verified	Runtime not configured
Daytona	Isolated pre-publish sandbox audit	Read-only auth verified	Sandbox not run
Nosana	Existing GPU job proof; paid submit has a separate guard	Read-only auth verified	GPU job not submitted
Qoder	Expert Panel / Repo Wiki development workflow	Read-only auth verified	Developer tooling

Authentication proves connectivity - not generation. Billable inference, GPU and sandbox execution are not claimed.

Sequential, bounded, fail-closed

GUARD CONTRACT

Durable maximum-cost reservation | one billable action at a time | zero automatic retries

Unknown cap, price, estimate, hard limit or reconciliation > no call

Automatic listing webhook: signed + idempotent, integration-ready (destination not configured)

Deployed, browser-tested, and deliberately honest

94 / 94

Vitest

12

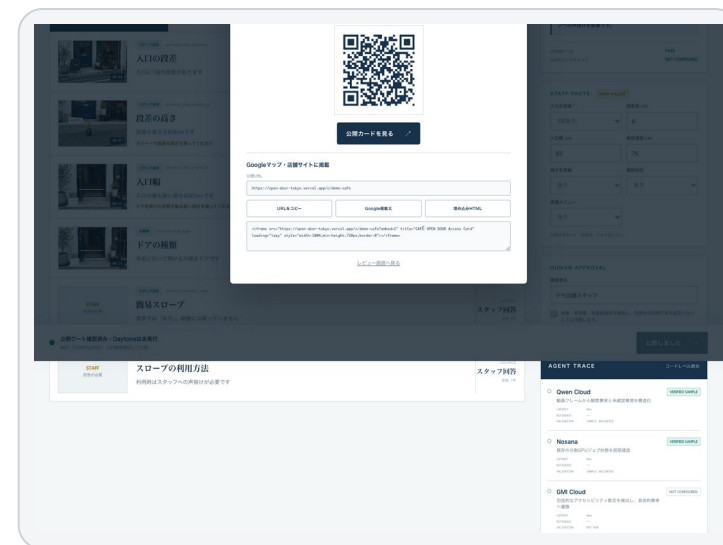

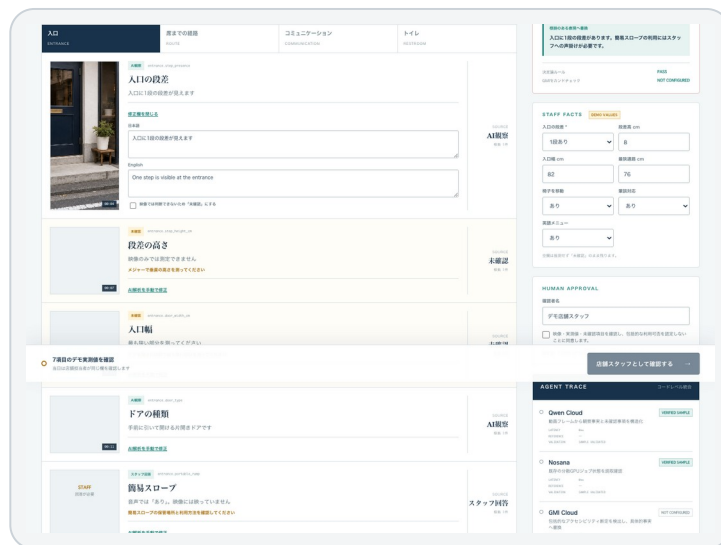

local browser passed

2 / 2

production sample E2E

0

audit vulnerabilities

Production: READY | typecheck/build PASS | desktop + mobile verified

Qwen is configured and model availability is confirmed. Billable inference is still NOT RUN.

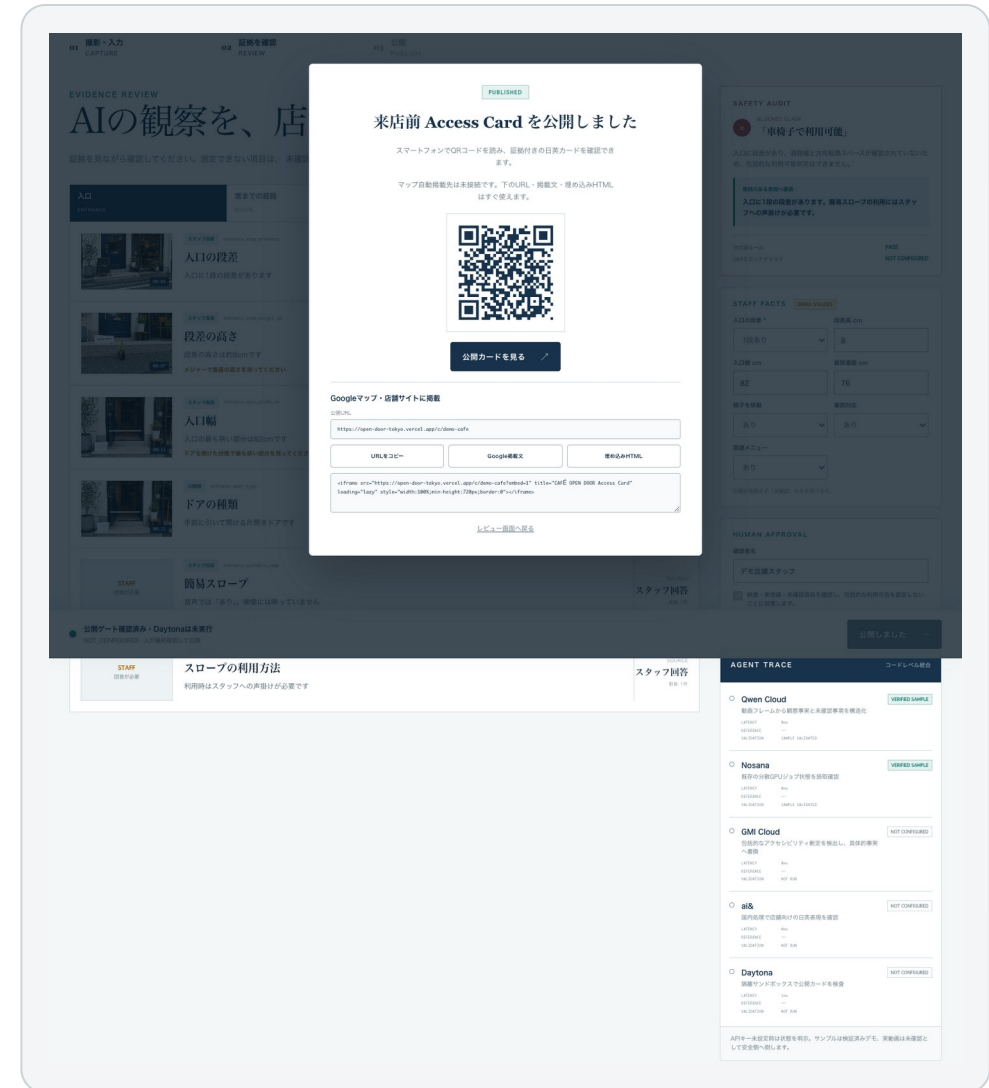

From verified demo to a small Tokyo venue pilot.

We are looking for

- Pilot venues
- Accessibility reviewers & users
- Sponsor support for one guarded live proof

We do not certify. We clarify.
